Experience

Wikiance **December 2024 – June 2025**
Frontend Developer Intern *Remote*

- Worked on real-world projects using Next.js, leveraging Server-Side Rendering (SSR) and Incremental Static Regeneration (ISR) for optimized performance.
- Developed responsive UI components with Material-UI and ensured seamless integration with backend APIs.
- Implemented unit testing using Jest to enhance code reliability and maintainability.
- Gained hands-on experience with CI/CD pipelines and AI-driven code analysis for automated testing and deployment.
- Collaborated remotely with backend developers and a team of 4-5 frontend interns, improving teamwork, communication, and project coordination.
- Analyzed and fixed 500+ reliability and maintainability issues reported by SonarQube, reducing them to 0 by thoroughly reviewing and optimizing the entire product codebase.

Projects

TalkEase - AI-Powered Mental Health Chatbot | *React, Node.js, Python, NLP* `GitHub`

- Optimized a 16GB fine-tuned NLP model to 3.8GB, improving storage and deployment efficiency.
- Enhanced response time to 1.81s for long replies and integrated AI-driven motivational content.
- Implemented mood tracking, mental health classification, and multimodal analysis using text, audio, and video.
- Explored emotional intelligence in AI to generate human-like, engaging responses.

DA-Visual - Data Structure and Algorithm Visualization | *React.js, Node.js, MongoDB* `GitHub`

- Developed an interactive platform to visualize data structures and algorithms for better conceptual understanding.
- Faced challenges in implementing tree visualization, especially connecting nodes dynamically.
- Designed step-by-step visual demonstrations of insertion and deletion to help users grasp algorithmic operations.

Bus Reservation API | *Java, Spring Boot* `GitHub`

- Built a robust API to manage ticket bookings, cancellations, and seat availability efficiently.
- Resolved a challenging circular dependency issue that was affecting service-layer interactions.
- Implemented secure authentication and optimized concurrent booking handling for accuracy and reliability.

OrphanConnect - Child Adoption and Care System | *ASP.NET, SQL Server* `GitHub`

- Developed a management system to streamline orphanage operations, child adoption, and donor interactions.
- Implemented secure authentication and data management to ensure accuracy and privacy in records.
- Optimized workflows for adoption requests, background verification, and resource allocation for better efficiency.

Technical Skills

Programming Languages: Java, C, C++, JavaScript
Web Development: MERN Stack,Nextjs, ASP.NET Framework, Spring Boot, RESTful APIs
Machine Learning AI: NLP, Deep Learning, Transformers, TensorFlow, PyTorch, Scikit-learn
DevOps : Kubernetes, Docker, Jenkins, Firebase
Testing Tools: Jest, Postman, Git, GitHub

Education

Dharmsinh Desai University **Sep. 2022 – May 2026**
Bachelor of Technology in Computer Engineering *Nadiad, Gujarat*

Relevant Coursework

- Data Structures
- Operating System
- Computer Network
- Database Management
- Machine Learning
- Deep learning
- Object Oriented Programming

Leadership & Extracurricular

CSI DDU **2023 – Present**
Senior Technical Associate
Organized and Host events, workshops.

LeetCode: 1600+ rating,and in top 13% , 800+ problems solved.

Led the Bhashathon team, achieving 0.93 GLEU (Hindi), 0.76 GLEU (English) in a misspelling corrector, also selcted as 1st runner up

Participated in 7+ hackathons, showcasing problem-solving skills.
